## **Delegates at this year's Resourcing the Future Conference**

tell us their thoughts on the challenges and opportunities currently facing the sector.

What measure would most effectively 'mainstream' resource productivity and efficiency across UK industry, not just the big brands?

11 6

To what extent is consumer perception, expectation and behaviour a barrier?

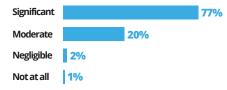

How important do you think it will be to move away from weight-based to environmentallyfocused targets?

**Extended Producer** Responsibility policy that rewards resource efficient design

50

Set a legally binding **UK resource** productivity target

**Important** 61% Extremely important 26% 13% importánt Not important

regulations beyond energy-consuming products

Extend eco-design

A stronger focus on resource productivity in current and future carbon budgets

33

How useful would an approach be that enhances weight-based targets by factoring in environmental impact metrics?

What would be the most effective policy/fiscal measure to reduce plastic packaging waste?

Ban / tax

What area of focus should be the top priority for nonpackaging plastics?

Not at all (3%)

**Moderately** (28%)

Very (69%) Introduce differentiated **EPR** fees to stimulate eco-design and

packaging recycling

targets

single-use plastics recycled content

55 13 11 Increase plastic Introduce a deposit

**Reducing carbon** impact over the lifecycle (14%) **Designing out** harmful materials (16%)

at all

**Enabling easier** recycling (42%)**Extending** product life (28%)

**How concerned** are you about the Chinese and potential other export market restrictions and their impact on future UK recycling performance?

Does the sector have sufficient understanding of the reprocessing infrastructure in the other export markets where materials are now being sent?

return scheme for plastic

(and other) containers
